

Description

The FOC series fire hose reel cabinet is designed for surface wall mounted installation, made of mild steel and finished with red epoxy electrostatic powder coating for durability and aesthetic appeal. It securely stores and protects fire hose reels, making it an essential safety fixture for office buildings, shopping malls, hotels and other construction works for use by the occupants.

Featuring a mesh glass panel on the cabinet door, the design allows for easy visual inspection of the internal equipment, ensuring quick accessibility during emergencies.

Customization options include stainless steel or aluminum materials, along with tailored surface treatments and silk-screened labeling to meet specific requirements.

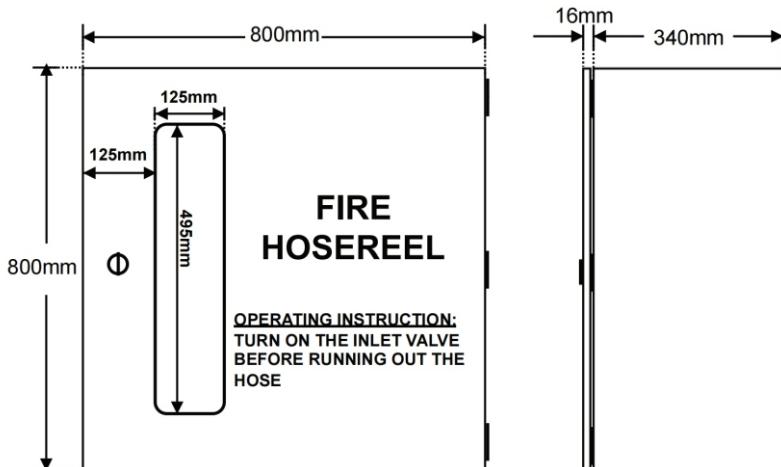

Features

- Sturdy structure and elegant appearance
- High-quality powder coating for excellent rust resistance and durability
- The mounting bracket for the fire hose reel is preassembled for easy and fast installation.
