

Description

The FOC series swing type fire hose reel features a robust design with carbon steel discs coated in red epoxy powder, a brass waterway, and semi-rigid hoses equipped with a jet/spray nozzle. Positioned for wall or cabinet mounting, it offers a controlled water supply crucial for fire risk mitigation in various settings like schools, hotels, and factories. Designed for ease of use, its swinging arm allows extensive rotation, facilitating efficient extinguishing during emergencies.

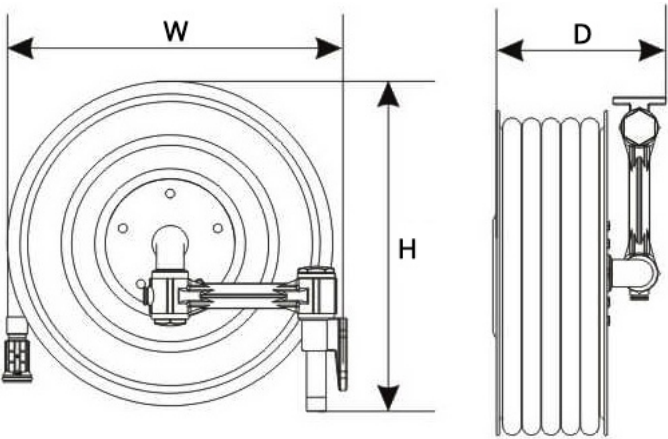

Features

- Robust structure and elegant design
- High-quality semi-rigid hoses confirming to EN694 / LBCP
- The nozzle functioning SHUT, JET and SPRAY control modes
- Red powder coating for excellent rust resistance and durability
- Easy and fast installation
